On-Page SEO Results

Your On-Page SEO is good

Your page is mostly optimized for On-Page SEO performance. On-Page SEO is important to ensure Search Engines can understand your content appropriately and help it rank for relevant keywords. You can continue to improve your page by ensuring HTML Tag Content is completed correctly and text content is well aligned with chosen keywords.

Title Tag

You have a Title Tag, but ideally it should be between 50 and 60 characters in length (including spaces).

Safekey Castle Private Limited

Length : 30

Title Tags are very important for search engines to correctly understand and categorize your content.

Meta Description Tag

Your page has a Meta Description of optimal length (between 120 and 160 characters).

Safekey Castle Private Limited offers trusted real estate projects with detailed listings and expert guidance for your property investments.

Length : 140

SERP Snippet Preview

This illustrates how your page may appear in Search Results. Note, this is intended as a guide and Search Engines are more frequently generating this content dynamically.

Amount of Content

Your page has a low volume of text content which search engines can interpret as 'thin content'.

Word Count: 175

It has been well researched that higher text content volumes are related to better ranking ability in general.

Image Alt Attributes

You do not have any images missing Alt Attributes on your page.

Canonical Tag

Your page is using the Canonical Tag.

<https://safekey.in/>

Noindex Tag Test

Your page is not using the Noindex Tag which prevents indexing.

Noindex Header Test

Your page is not using the Noindex Header which prevents indexing.

SSL Enabled

Your website has SSL enabled.

HTTPS Redirect

Your page successfully redirects to a HTTPS (SSL secure) version.

Robots.txt

Your website appears to have a robots.txt file.

<http://safekey.in/robots.txt>

Blocked by Robots.txt

Your page does not appear to be blocked by robots.txt.

Llms.txt New

We have not detected or been able to retrieve a Llms.txt file successfully.

XML Sitemaps

Your website appears to have an XML Sitemap.

<https://safekey.in/wp-sitemap.xml>

Analytics

We could not detect an analytics tool installed on your page.

Website analytics tools like Google Analytics assist you in measuring, analyzing and ultimately improving traffic to your page.

Schema.org Structured Data

We have not detected any usage of Schema.org on your page.

Schema.org is a structured data markup for webpages which helps Search Engines understand your site better and provide rich snippets directly in their search results.

Identity Schema New

No Organization or Person Schema identified on the page.

The absence of Organization or Person Schema can make it harder for Search Engines and LLMs to identify the ownership of a website and confidently answer brand, company or person queries.

Rendered Content (LLM Readability) New

Your page has a high level of rendering (changes to the HTML).

Rendering Percentage: 23%

Dynamically rendering a lot of page content risks some important information being missed by LLMs that generally do not read this content.

Usability

Your usability could be better

Your page is OK but could be more usable across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

Device Rendering

This check visually demonstrates how your page renders on different devices. It is important that your page is optimized for mobile and tablet experiences as today the majority of web traffic comes from these sources.

Google's Core Web Vitals

Google is indicating that they do not have 'sufficient real-world speed data for this page' in order to make a Core Web Vitals assessment. This can occur for smaller websites or those that are not crawl-able by Google.

Use of Mobile Viewports

Your page specifies a Viewport matching the device's size, allowing it to render appropriately across devices.

Google's PageSpeed Insights - Mobile

Google is indicating that your page is scoring poorly on their Mobile PageSpeed Insights evaluation.

Note that this evaluation is being performed from US servers and the results may differ slightly from an evaluation carried out from Google's PageSpeed Web Interface as that reporting localizes to the region in which you are running the report.

Google has indicated that the performance of a webpage is becoming more important from a user and subsequently ranking perspective.

Flash Used?

No Flash content has been identified on your page.

iFrames Used?

There are no iFrames detected on your page.

Favicon

We have not identified a Favicon on your page.

Favicons are a way to increase brand visibility and make your page more recognizable when browsing amongst multiple browser tabs or bookmarks.

Email Privacy

Email addresses have been found in plain text.

We recommend removing any plain text email addresses and replacing them with images or contact forms. Plain text email addresses can be susceptible to scrapers and email spammers.

Legible Font Sizes

The text on your page appears to be legible across devices.

Tap Target Sizing

The links and buttons on your page appear to be appropriately sized for a user to easily tap on a touchscreen.

Performance Results

Your performance could be better

Your page's performance has some issues and room for improvement. Performance is important to ensure a good user experience, and reduced bounce rates (which can also indirectly affect your search engine rankings). We recommend addressing the highlighted factors below.

Website Load Speed

Your page loads slowly.

Page load speed is critical to ensuring good user experience and is becoming a more important ranking factor. Load speed can be impacted by a multitude of factors however and may need technical resources to investigate.

Server Response

Your website is using the recommended HTTP/2+ Protocol.

Optimize Images
All of the images on your page appear to be optimized.

Minification
All your JavaScript and CSS files appear to be minified.

Deprecated HTML

No deprecated HTML tags have been found within your page.

Inline Styles

Your page appears to be using Inline Styles.

Inline Styles are an older coding practice and discouraged in favor of using CSS style sheets, due to their ability to degrade page load performance and unnecessarily complicate HTML Code.

Social Results

Your social needs improvement

You appear to have a weak social presence or level of social activity (or we may just not be able to see your profiles!). Social activity is important for customer communication, brand awareness and as a marketing channel to bring visitors to your website. We recommend that you list all of your profiles on your page for visibility, and begin to build a following on those networks.

Facebook Page Linked

No associated Facebook Page found as a link on your page.

Facebook Open Graph Tags

We have not found Facebook Open Graph Tags on your page.

Facebook Open Graph Tags are a type of structured data that can be placed on your page to control what content is shown when a page is shared on Facebook.

Facebook Pixel

We have not detected a Facebook Pixel on your page.

Facebook's Pixel is a useful piece of analytics code that allows you to retarget visitors if you decide to run Facebook Ads in future.

X (formerly Twitter) Account Linked
