On-Page SEO Results

Your On-Page SEO is good

Your page is mostly optimized for On-Page SEO performance. On-Page SEO is important to ensure Search Engines can understand your content appropriately and help it rank for relevant keywords. You can continue to improve your page by ensuring HTML Tag Content is completed correctly and text content is well aligned with chosen keywords.

Title Tag

You have a Title Tag, but ideally it should be between 50 and 60 characters in length (including spaces).

Iconic Realty: Best Real Estate Agent in Gurgaon

Length : 48

Title Tags are very important for search engines to correctly understand and categorize your content.

Meta Description Tag

Your page has a Meta Description of optimal length (between 120 and 160 characters).

Iconic Realty is your trusted partner and premier real estate agent in gurgaon. specializing in securing the best deals across Gurgaon

Length : 134

SERP Snippet Preview

Amount of Content ×

Your page has a low volume of text content which search engines can interpret as 'thin content'.

Word Count: 255

It has been well researched that higher text content volumes are related to better ranking ability in general.

Image Alt Attributes

You have images on your page that are missing Alt Attributes.

We found 87 images on your page and 5 of them are missing the attribute.

Alt Attributes are an often overlooked and simple way to signal to Search Engines what an image is about, and help it rank in image search results.

Usability

Your usability is good

Your page is mostly usable across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

Device Rendering

This check visually demonstrates how your page renders on different devices. It is important that your page is optimized for mobile and tablet experiences as today the majority of web traffic comes from these sources.

i

Use of Mobile Viewports

Your page specifies a Viewport matching the device's size, allowing it to render appropriately across devices.

Flash Used?

No Flash content has been identified on your page.

iFrames Used?

There are no iFrames detected on your page.

Favicon

Your page has specified a Favicon.

Email Privacy

Email addresses have been found in plain text.

We recommend removing any plain text email addresses and replacing them with images or contact forms. Plain text email addresses can be susceptible to scrapers and email spammers.

Performance Results

Your performance could be better

Your page's performance has some issues and room for improvement. Performance is important to ensure a good user experience, and reduced bounce rates (which can also indirectly affect your search engine rankings). We recommend addressing the highlighted factors below.

Website Load Speed

Your page loads in a reasonable amount of time.

Server Response

All Page Content Loaded

All Page Scripts Complete

Website Download Size

Your page's file size is quite large which, regardless of other optimizations, can reduce load speed and impact user experience.

A general rule is to keep your page under 5MB in total file size.

HTTP2 Usage

Your website is using the recommended HTTP/2+ Protocol.

Deprecated HTML

No deprecated HTML tags have been found within your page.

Inline Styles

Your page appears to be using Inline Styles.

Inline Styles are an older coding practice and discouraged in favor of using CSS style sheets, due to their ability to degrade page load performance and unnecessarily complicate HTML Code.
