On-Page SEO Results

Your On-Page SEO could be better

Your page has some level of On-Page SEO optimization but could be improved further. On-Page SEO is important to ensure Search Engines can understand your content appropriately and help it rank for relevant keywords. You should ensure that HTML Tag Content is completed correctly and align text content to target keywords.

Title Tag

You have a Title Tag, but ideally it should be shortened to between 50 and 60 characters (including spaces).

Tribeca Developers - Real Estate Developer in Delhi NCR, Gurugaon, Noida & Kolkata

Length : 82

Title Tags are very important for search engines to correctly understand and categorize your content.

Meta Description Tag

Your page has a Meta Description of optimal length (between 120 and 160 characters).

Tribeca Developers is india's leading real estate developer wide range of commercial and residential properties in Delhi NCR, Gurugaon, Noida & Kolkata

Length : 151

SERP Snippet Preview

This illustrates how your page may appear in Search Results. Note, this is intended as a guide and Search Engines are more frequently generating this content dynamically.

Hreflang Usage

Your page is not making use of Hreflang attributes.

Language

Your page is using the Lang Attribute.

Declared: English

H1 Header Tag Usage

Your page does not have an H1 Header Tag.

The H1 Header Tag is an important way of signaling to search engines what your content is about, and subsequently the keywords it should rank for.

H2-H6 Header Tag Usage

Your page is not making use of multiple levels of Header Tags.

HTML Header Tags are an important way of signaling to search engines the important content topics of your page, and subsequently the keywords it should rank for.

Keyword Consistency

Your page's main keywords are not distributed well across the important HTML Tags.

Your page content should be focused around particular keywords you would like to rank for. Ideally these keywords should also be distributed across tags such as the title, meta and header tags.

Amount of Content

Your page has a low volume of text content which search engines can interpret as 'thin content'.

Word Count: 283

It has been well researched that higher text content volumes are related to better ranking ability in general.

Image Alt Attributes

You have images on your page that are missing Alt Attributes.

We found 20 images on your page and 4 of them are missing the attribute.

Alt Attributes are an often overlooked and simple way to signal to Search Engines what an image is about, and help it rank in image search results.

Canonical Tag

Your page is not using the Canonical Tag.

The Canonical Tag tells Search Engines the primary URL of a page. Google recommends all pages specify a Canonical.

Noindex Tag Test

Your page is not using the Noindex Tag which prevents indexing.

Noindex Header Test

Your page is not using the Noindex Header which prevents indexing.

SSL Enabled

Your website has SSL enabled.

HTTPS Redirect

Your page successfully redirects to a HTTPS (SSL secure) version.

Robots.txt

Your website appears to have a robots.txt file.

http://tribecadevelopers.com/robots.txt

Blocked by Robots.txt

Your page does not appear to be blocked by robots.txt.

Llms.txt New

We have not detected or been able to retrieve a llms.txt file successfully.

XML Sitemaps

Your website appears to have an XML Sitemap.

Analytics

Your page is using an analytics tool.

 Google Analytics

Schema.org Structured Data

We have not detected any usage of Schema.org on your page.

Schema.org is a structured data markup for webpages which helps Search Engines understand your site better and provide rich snippets directly in their search results.

Identity Schema New

No Organization or Person Schema identified on the page.

The absence of Organization or Person Schema can make it harder for Search Engines and LLMs to identify the ownership of a website and confidently answer brand, company or person queries.

Rendered Content (LLM Readability) New

Your page has a high level of rendering (changes to the HTML).

Rendering Percentage: 24%

Dynamically rendering a lot of page content risks some important information being missed by LLMs that generally do not read this content.

Usability

Your usability could be better

Your page is OK but could be more usable across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

Device Rendering

This check visually demonstrates how your page renders on different devices. It is important that your page is optimized for mobile and tablet experiences as today the majority of web traffic comes from these sources.

Google's Core Web Vitals

Google is indicating that they do not have 'sufficient real-world speed data for this page' in order to make a Core Web Vitals assessment. This can occur for smaller websites or those that are not crawl-able by Google.

Use of Mobile Viewports

Your page specifies a Viewport matching the device's size, allowing it to render appropriately across devices.

Google's PageSpeed Insights - Mobile

Google is indicating that your page is scoring poorly on their Mobile PageSpeed Insights evaluation.

Note that this evaluation is being performed from US servers and the results may differ slightly from an evaluation carried out from Google's PageSpeed Web Interface as that reporting localizes to the region in which you are running the report.

Google has indicated that the performance of a webpage is becoming more important from a user and subsequently ranking perspective.

Performance Results

Your performance could be better

Your page's performance has some issues and room for improvement. Performance is important to ensure a good user experience, and reduced bounce rates (which can also indirectly affect your search engine rankings). We recommend addressing the highlighted factors below.

Website Load Speed

Your page loads slowly.

Page load speed is critical to ensuring good user experience and is becoming a more important ranking factor. Load speed can be impacted by a multitude of factors however and may need technical resources to investigate.
